# At home or anywhere, the Homepump\* system is the trusted brand you know.

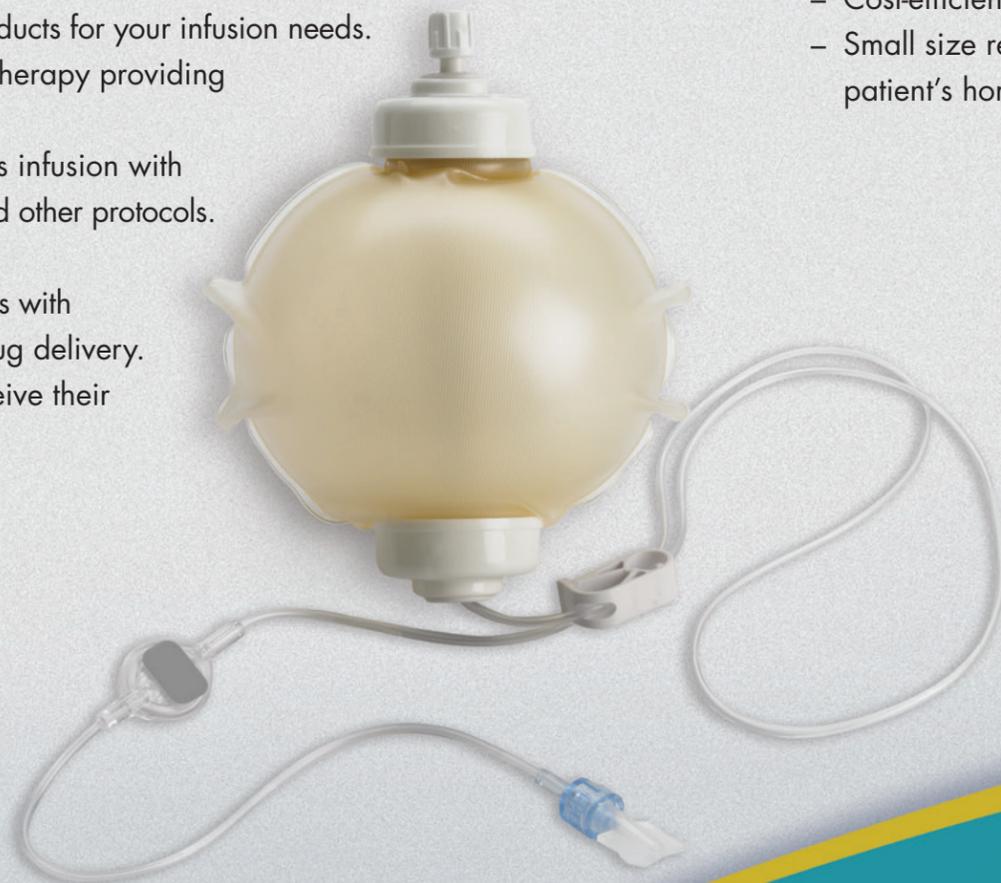

For more than two decades the Homepump system has delivered cost-effective, patient minded benefits, with a simplicity of use that may save time for both clinicians and patients.

## Homepump Eclipse\* and Homepump C-Series\* Ambulatory Infusion Systems

The Homepump system offers a complete family of products for your infusion needs.

- Eclipse system – the pump designed for antibiotic therapy providing delivery times from 30 minutes to 5 hours.
- C-Series system – the portable pump for continuous infusion with delivery times from 1-11 days for chemotherapy and other protocols.

The Homepump system combines high quality standards with the volumes and flow rates you need for successful drug delivery. The pump's proven ease of use allows patients to receive their therapy in the comfort of home.

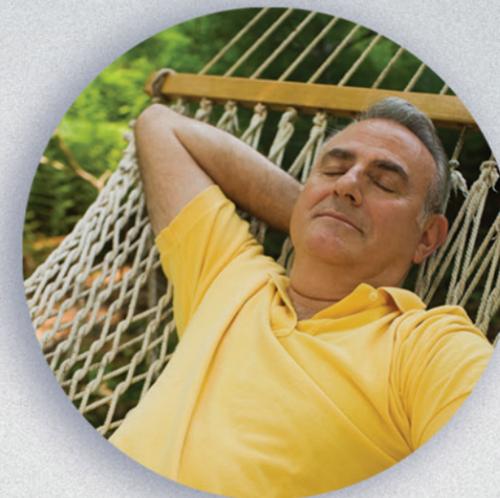

## Performance you can trust.

- Comprehensive drug compatibility and stability data.
- Patented, elastomeric membrane delivers performance and dependability.
- Pre-set flow rate – no complex programming or drop counting simplifies life for clinicians as well as patients.
- Overfill/partial fill capacity allows dosing flexibility.

## Compact features. Huge benefits.

- Discreet, portable and patient-friendly.
- Allows patient mobility for patients to maintain lifestyle at home.
- Non-electronic: no complex programming, maintenance, power cords, batteries or IV poles.
- Disposable design lets patients discard unit after use.
- Cost-efficient without sacrificing choice of volumes and flow rates.
- Small size requires less space to store both in pharmacy and in the patient's home.

## World-class performance.

At home or on the road, the Homepump system lives up to its long history of performance, dependability, convenience and safety. Learn more about the infusion pump that's at home anywhere.
